

OCEANIC®

KNIFE INSTRUCTIONS

WARNING

**This knife is extremely sharp.
It can inflict serious injury.
Keep out of children's reach.
Do Not use as a pry bar.**

Locking Mechanism Operation

- A. Removal from the sheath:
Grasp the knife handle, and while depressing the button on the sheath, pull the knife out.
- B. Insert the knife into the sheath until it locks (clicks) into place.
(Either side can be facing out..)

Care and Maintenance

-  Caution: Do not attempt to disassemble the knife for cleaning.**
- A. Rinse the knife and sheath with fresh water after each day of diving.
- B. Towel dry, and apply a light coat of silicon to the knife blade.
- C. Store in a dry place, away from wet equipment.
- D. Rub the blade with steel wool to remove any signs of corrosion.

2-Year Limited Warranty

Your knife is guaranteed to be free of defects in material and/or workmanship under normal scuba use for a period of two years from the original date of consumer purchase, provided proper care and maintenance have been performed as prescribed. Warranty does not extend to cover damage from accident, abuse, tampering, lack of maintenance, theft or loss. To obtain warranty service, return your knife and sheath to an Authorized Oceanic Dealer with a copy of the sales receipt.

Strap Installation

Tip: Straps and buckles are preassembled. Keep one assembled for reference while installing the other.

- A. Disassemble one of the strap/buckle assemblies.
- B. Pass the strap, tapered end first, through the slot located in the female half of the buckle.
- C. Pass the strap, tapered end first, through the top slot located on the back side of the sheath.
- D. Place the rubber o-ring onto the strap.
- E. Pass the tapered end of the strap through the inner slot of the male half of the buckle, and pull through several inches.
- F. Pass the tapered end back through the other slot and through the o-ring.
- G. Repeat steps A through F for the lower strap assembly.

Strap Length Adjustment

- A. Position the sheath at the location on your leg where you plan to normally wear the knife.
- B. Snap the buckle ends together, and tighten by pulling the tapered ends of the straps through the slots in the buckles.
Tip: To compensate for wet suit compression at depth, make the straps a little tighter.
- C. Allow at least 3 or 4 inches extra length, and cut excess from the straps. Ensure that sufficient length exists for your thickest wet suit.
